Source commit: 77fee57f8ae6

How to open a Dubbo ITAD branch / partner hub — cost, effort, payoff and exact process

Research date: 2 October 2026 (AEST)

Scope: Greenbox, G1 Asset Management, Fliptech, WV Technologies, Renew IT, Shred-X, and Iron Mountain / former ACT Logistics.

Executive answer

The most important finding is:

None of the seven publicly offers a simple "buy a Dubbo franchise" product.

There are three genuinely different ways this could happen:

1. Partner / white-label model — you own the local customer relationship, while the national ITAD company performs some or all secure processing.
2. Approved satellite / aggregation hub — you operate a secure Dubbo facility under the parent company's standards.
3. Corporate branch — the parent company itself opens the branch, owns the systems/contracts and employs / contracts local staff.

The cheapest and lowest-effort route is not a warehouse.

The strongest sequence is:

partner first → prove recurring clients → run regional jobs → measure volume and margin → open local secure premises only when the economics justify them.

1. Best overall ranking — easiest + cheapest + effort + payoff

This ranking is about what is realistically easiest for a Dubbo operator to enter, not simply which national company is largest.

Rank	Company / pathway	Ease	Initial cash requirement	Potential payoff to local operator	Why
1	Greenbox Partner Program	Highest	Lowest	High	Formal public partner program, co-branding, white label, direct servicing, preferred pricing and asset-recovery margins
2	G1 white-labelled ITAD	Very high	Very low	High	G1 explicitly sells white-labelled ITAD to IT service providers and already covers regional NSW
3	Fliptech regional pilot / authorised operator	Medium	Low initially	Potentially very high	Best cultural/business-model fit, but no public partner system; commercial terms must be invented together
4	WV Technologies commercial partner	Medium	Low-medium	High	WV explicitly recognises commercial partners for secure logistics/component recovery, but publishes no onboarding recipe
5	Iron Mountain Global Partner + ALM	Medium-low	Low as a channel partner; high as a branch	High	Potentially high but enterprise-heavy Public global partner program exists, but this does not automatically give rights to operate an ALM branch
6	Renew IT regional depot proposal	Low-medium	Medium if physical	Medium-high	Strong depot model but no public channel/branch program; likely requires corporate approval
7	Shred-X corporate branch proposal	Lowest for self-owned operation	High	Potentially high only at substantial scale	Proven branch network, but no public franchise path; a Dubbo location would most likely be corporate-owned

Best payoff per dollar

Greenbox partner first.

Best near-zero-capex white-label option

G1.

Best entrepreneurial "build something locally with the parent" opportunity

Fliptech.

Best chance of eventually becoming a large formal secure facility

Greenbox / G1 / WV, if local volume is proved.

2. Critical correction — "branch" does not necessarily mean you own it

For several candidates, a Dubbo "branch" would probably mean:

- the parent company signs the lease;
- the parent company owns the security/compliance systems;
- the parent company holds certifications;
- you are local manager / employee / contractor / business-development partner.

That means the local operator's upside might be:

- salary;
- commission;
- service margin;
- subcontracting revenue;

rather than owning the entire resale margin.

For Greenbox and G1, the public model gives a much clearer route for an independent local business to earn revenue without waiting for a corporate-owned branch.

3. What can be costed exactly today — and what cannot

The user asked for the exact cost.

An exact all-in branch cost cannot currently be stated because no shortlisted company publishes:

- Dubbo territory fee;
- franchise fee;
- partner commission;
- security standard for a Dubbo site;
- required insurance limits;
- vehicle specification;

- staffing requirement;
- branch fitout specification;
- bond;
- asset-processing volume;
- revenue split.

Anyone giving one exact total now would be inventing private commercial terms.

What can be stated exactly or from current published market evidence is below.

4. Published / current cost benchmarks

Business name

Current business.gov.au guidance gives:

- \$47 for 1 year
- \$108 for 3 years

Source:

<https://business.gov.au/registrations/register-your-business-name>

If operating under an existing registered business/entity and no new business name is required, this may be \$0.

NSW second-hand dealer licence

If the legal model requires the operator itself to acquire and resell prescribed second-hand electronic goods:

- 1 year: \$692
- 3 years: \$1,574
- 5 years: \$2,456

2026–27 official NSW fees.

Source:

<https://www.nsw.gov.au/business-and-economy/running-a-business/industry-specific-business-requirements/pawnbrokers-and-second-hand-dealers/pawnbrokers-and-second-hand-dealers-fees>

This may not apply where:

- the parent ITAD company retains ownership;
- the local operator only sells/refers services;
- another statutory exemption applies.

That needs Fair Trading confirmation.

Current Dubbo industrial-premises benchmark

A current brand-new industrial unit at 13 McGuinn Crescent, Dubbo is advertised at:

- 190 m²
- \$395/week + GST
- approximately \$20,540/year + GST
- proportionate outgoings extra
- 2-5 year lease
- automatic gated security
- three-phase power
- office + amenities.

Source:

<https://www.eldersrealestate.com.au/commercial/rent/13-mcguinn-crescent-dubbo-nsw-2830-300P181435/>

This is not a recommended or approved ITAD site. It is simply a useful current real-Dubbo rent benchmark.

Planning/use approval still needs checking.

Security-system benchmark

A current Australian commercial-security cost guide puts a small commercial project at the low end around:

- \$5,000+

with larger integrated CCTV/access-control/alarm projects much higher.

Source:

<https://www.securitywholesalers.com.au/guides/security-costs/commercial-security-system-cost/>

This is an indicative market benchmark, not a quote.

Blanco-style erasure

Blanco itself currently uses quote-based platform pricing.

Australian reseller pricing currently shows examples including:

- SMB Select 50 Bundle: \$982.30
- Drive Eraser Enterprise 50-499: \$22.59 per event/licence unit
- Essentials platform fee: \$2,750
- Management Console 50-499 assets: \$982.30

Source:

<https://shop.tech2000.com.au/brand/blanco/>

The actual parent company may:

- provide licences;
- require its own tenant/account;
- prohibit local independent licensing;
- use another product/process.

So do not buy Blancco until the parent company tells you how local erasure must be done.

Labour floor if hiring staff

From 1 July 2026:

- National Minimum Wage: \$26.44/hour
- \$1,004.90/week
- casual floor for an award/agreement-free adult: \$33.05/hour
- super guarantee: 12%

Sources:

- <https://www.fairwork.gov.au/pay-and-wages/minimum-wages>
- <https://www.ato.gov.au/tax-rates-and-codes/key-superannuation-rates-and-thresholds/super-guarantee>

One full-time worker — absolute national-minimum floor

Base:

- $\$1,004.90 \times 52 = \$52,254.80/\text{year}$

12% super:

- \$6,270.58

Minimum wage + super:

- \$58,525.38/year

This excludes:

- workers compensation;
- payroll software;
- leave-related on-costs beyond base calculation;
- allowances;
- overtime;
- award rates that may actually apply.

Therefore it is only a legal wage-floor benchmark.

One casual for two 8-hour days each week

At \$33.05/hour:

- $16 \text{ hours} \times 52 \times \$33.05 = \$27,497.60$
- 12% super = \$3,299.71
- total = \$30,797.31/year

Again, an applicable award could require more.

5. Three realistic cost levels

Level A — partner / white-label sales operation

You do not lease a warehouse.

You:

- find Dubbo/Central West clients;
- qualify the jobs;
- sell/white-label the national provider's ITAD service;
- parent provider performs secure collection/processing;
- you earn agreed margin / commission / service revenue.

Published hard-cost floor

Potentially:

- company partner fee: no public fee stated for Greenbox/G1/WV/Iron Mountain;
- new business name if required: \$47/year;
- premises: \$0;
- Blancco: \$0 if the parent performs erasure;
- branch vehicle: \$0 if parent collects.

Unknown but real costs

- public/product liability;
- professional/cyber cover if required;
- phone/software;
- sales travel;
- company-specific commercial terms.

This is the lowest-cost path.

Level B — secure Dubbo collection / aggregation hub

Example first-year baseline using current public benchmarks:

- 190 m² rent: \$20,540 + GST/year
- low-end commercial security allowance: \$5,000
- Blancco 50-device bundle benchmark: \$982.30 if local erase is allowed
- second-hand dealer licence: \$692 if legally required
- business name: \$47 if needed

Baseline subtotal

\$27,261.30 before:

- GST cashflow;
- lease bond;
- outgoings;
- insurance;
- electricity/internet;
- shelving/racking;
- lockable data-media cabinet;

- fire/battery controls;
- vehicle/freight;
- tools/test benches;
- computers;
- signage;
- legal/accounting;
- planning/DA if required;
- labour.

This is not an exact total. It is the minimum modelled first-year baseline from currently published figures.

With one full-time worker at national-minimum wage floor

\$27,261.30

- \$58,525.38 wage/super floor

= \$85,786.68

before all the other unknown items above.

That demonstrates why a local warehouse should come after the partner model proves the volume.

Level C — full processing branch

A true secure ITAD processing facility may require:

- secure premise;
- CCTV;
- access control;
- alarm monitoring;
- restricted data zone;
- chain-of-custody system;
- processing benches;
- diagnostic stations;
- data-erasure licensing;
- lockable media storage;
- verified destruction route;
- racking;
- battery/fire separation;
- loading equipment;
- staff;
- vehicle/freight;
- certifications/audits depending on parent model.

There is no defensible exact public cost for this because each parent company defines its facility standard privately.

Do not sign a warehouse lease until the parent supplies a written facility specification.

6. GREENBOX — easiest and most structured path

Why it ranks #1

Greenbox is the only shortlisted company with a public partner-onboarding recipe.

Greenbox says its partner program supports:

- co-branding;
- white labelling;
- directly servicing partner customers;
- preferred pricing;
- dedicated sales support;
- partner incentives;
- portal access;
- accreditation badge;
- asset-recovery margins.

Sources:

<https://www.greenbox.com.au/partners/>

<https://www.greenbox.com.au/faqs/>

Exact published process

Step 1 — contact Greenbox partner sales

Ask specifically for:

Greenbox Partner Programme — regional NSW / Dubbo

Step 2 — complete the two-page partnership application

Greenbox says the application covers basic business details.

Step 3 — complete Greenbox's 12-month business plan template

Purpose:

show how much business the proposed partnership is likely to generate.

For Dubbo this should include:

- target organisations;
- expected device volumes;
- Central West/Orana geography;
- collection frequency;
- expected asset categories;
- existing local IT relationships;
- first 10–20 target accounts.

Step 4 — supply three references

Step 5 — provide three months of credit information

This is a real gate.

A brand-new entity with no trade history may therefore be weaker than an existing operating business.

Step 6 — Greenbox reviews application

Greenbox says it aims to advise the outcome within:

- 14 business days

Step 7 — complete mandatory online training

Greenbox operates an LMS with modules and quizzes.

Step 8 — sign partnership MOU / business plan

Greenbox says:

- no binding long-term partner contract is required simply to be a partner;
- an MOU describes how you work together;
- partner can leave the program.

Step 9 — negotiate Dubbo operating model

The cheapest version:

- you sell Greenbox services locally;
- Greenbox directly services client;
- no warehouse;
- no local custody.

Next level:

- co-branded/white-label first mile;
- local pickup/aggregation subject to Greenbox approval.

Step 10 — only propose a Dubbo hub once the 12-month pipeline proves it

Greenbox cost

Public partner joining fee

No fee is stated publicly.

The partner brochure/FAQ describes preferred pricing and onboarding but does not publish a membership fee.

Therefore:

Exact Greenbox commercial cost = unknown until partner pack / sales quote.

Cheapest practical entry

Potentially:

- \$0 Greenbox fee publicly identified;
- \$0 warehouse;
- \$0 local erasure software;
- \$47 business name only if a new name is required;

- insurance/sales expenses unknown.

Payoff

Greenbox explicitly says partners can improve competitiveness through margins on asset recovery services.

The actual margin percentage is private.

Overall

Best first contact.

7. G1 ASSET MANAGEMENT — probably the cheapest operational model

Why it ranks #2

G1 explicitly offers:

white-labelled ITAD services for managed IT service providers

including:

- plain-clothed service;
- unbranded disposal/data destruction/recycling reports;
- regional NSW coverage.

Source:

<https://g1.com.au/solutions/it-service-providers/>

This could let a Dubbo operator sell a complete enterprise ITAD service without building a secure processing plant.

Exact public process

Step 1

Operate as an IT service provider / business able to contract with local clients.

Step 2

Submit G1's quote/contact form.

G1 says it aims to respond within:

- 2 business hours

Step 3

Ask for:

white-labelled ITAD delivery for Dubbo/Central West clients

Step 4

Agree commercial structure:

- who invoices client;
- who collects;

- who owns asset value;
- who issues certificates;
- whether reports carry your brand;
- whether you add markup/service fee;
- buyback allocation.

Step 5

Start with G1 doing the collection

This avoids:

- local secure storage;
- local Blancco;
- local chain-of-custody facility.

Step 6

Build recurring volume.

Step 7

Only then ask:

Would G1 approve a Dubbo secure staging / satellite site?

G1 is particularly relevant because it already operates facilities in:

- Brisbane;
- Sydney;
- Canberra;
- Melbourne.

Cost

Public partner/white-label fee

No fee published.

G1 says pricing is provided by quote.

Therefore:

exact commercial price must come from G1.

Cheapest entry

Could be almost entirely:

- sales/client acquisition;
- existing business overhead;
- insurance;

with G1 performing the physical ITAD service.

Payoff

Potential revenue could include:

- markup/service fee;
- project-management margin;

- share of asset recovery/buyback;
- recurring client relationship.

None of those percentages is publicly disclosed.

Overall

Probably the lowest operational effort of the seven.

8. FLIPTECH — strongest entrepreneurial fit, but bespoke negotiation

Public position

No public:

- franchise;
- dealer program;
- partner application;
- territory fee;
- branch licence.

Source:

<https://www.fliptech.com.au/>

Contact:

<https://www.fliptech.com.au/forms/contact-us>

Process to pursue

Step 1

Do not ask to "buy a franchise".

Ask:

Would Fliptech test a Central West/Orana regional ITAD pilot in Dubbo?

Step 2

Present pipeline evidence:

- 10-20 target businesses;
- estimated devices/year;
- current disposal pain;
- regional travel/collection issue;
- reuse opportunity.

Step 3

Ask Fliptech to define permitted local scope:

- leads only;
- sales;
- collection;

- serial capture;
- secure staging;
- sanitisation;
- testing/grading;
- refurbishment;
- resale preparation.

Step 4

Run 3–6 collection cycles using Brookvale processing.

Step 5

Measure:

- jobs;
- assets;
- resale yield;
- freight;
- revenue;
- repeat demand.

Step 6

Negotiate regional hub only after proof.

Cost

No public partner or branch fee exists.

Lowest-cost pilot:

- no warehouse;
- no local erasure;
- use Fliptech collection/processing.

Full site cost:

- unknown pending Fliptech security/process specification.

Payoff

Potentially the highest entrepreneurial upside because a regional operating model could be created from scratch.

But it also has higher negotiation risk because no established program exists.

9. WV TECHNOLOGIES — commercial partnership route

WV publicly divides partners into:

- Strategic;
- Aligned;
- Commercial;
- Industry.

Its Commercial Partners specifically include functions such as:

- secure logistics;
- component recovery;
- operational delivery at scale.

Source:

<https://wvtech.com.au/partners/>

WV says it currently operates:

- 6 hubs across 5 states

Source:

<https://wvtech.com.au/contact/>

Process

Step 1

Contact WV and pitch:

Dubbo commercial logistics / ITAD operating partner

Step 2

Position the local role around:

- secure first-mile pickup;
- local enterprise relationships;
- staging;
- regional logistics;
- potential refurbishment/value recovery.

Step 3

WV determines whether the relationship is:

- Commercial Partner;
- aligned client/partner;
- subcontractor;
- future hub employee/contractor.

Step 4

If approved, obtain WV's:

- security requirements;
- custody SOP;
- insurance limits;
- reporting platform;
- permitted processing scope.

Step 5

Start logistics-first.

Step 6

Only invest in premises if WV awards enough recurring work.

Cost

No public partner fee or onboarding price.

Exact figure:

unknown until WV proposal.

Payoff

Potentially strong because WV sells into:

- government;
- enterprise;
- Indigenous/social procurement;
- ESG-driven contracts.

However the local operator's commercial share is private.

10. IRON MOUNTAIN — public partner program, but not an automatic ITAD branch

Iron Mountain has a public Global Partner Program.

It describes partner modes as:

Build, Sell, or Service, together.

It says the program is designed to formalise partnerships globally.

Partner support:

IRMChannels@ironmountain.com

Source:

<https://www.ironmountain.com/en-au/about-us/partners>

Iron Mountain has also acquired ACT Group to expand Australian/APAC Asset Lifecycle Management.

Source:

<https://www.ironmountain.com/en-au/services/it-asset-lifecycle-management>

Process

Step 1

Contact Iron Mountain Global Partner Program.

Step 2

Pitch:

Sell/Service partner for Asset Lifecycle Management in Dubbo/Central West NSW

Step 3

Clarify immediately:

- does partner program cover Australian ALM/ITAD?
- can a local partner perform physical services?
- or is it referral/resell only?

Step 4

Complete Iron Mountain due diligence/partner agreement if invited.

Step 5

Start by selling/referring/service coordination.

Step 6

Only discuss a physical Dubbo ALM node after enterprise volume is proven.

Cost

No public partner-entry fee found.

The partner page does not publish:

- fee;
- margin;
- revenue share;
- branch cost.

Payoff

Potentially large enterprise account access.

But:

- approval burden likely high;
- local autonomy likely lower;
- a full Dubbo facility would probably be corporate-led.

11. RENEW IT — depot proposal rather than franchise

Renew IT currently operates Australian facilities in:

- NSW;
- WA;
- VIC;

and says it provides asset drop-off points in all major Australian capital cities.

Source:

<https://renew-it.com/international/>

It does not publish a partner/franchise process for opening a regional branch.

Process

Step 1

Contact Renew IT head office.

Step 2

Pitch:

Western NSW / Dubbo last-mile collection and drop-off depot

not:

"I want to buy a franchise."

Step 3

Show:

- local fleet-refresh pipeline;
- distance from Lane Cove;
- estimated annual devices;
- existing local client relationships.

Step 4

Ask whether their existing capital-city drop points are:

- company-owned;
- contractors;
- logistics partners;
- third-party depots.

Step 5

Propose the same structure for Dubbo.

Step 6

Start with scheduled transport to Lane Cove.

Step 7

Only add local wiping/refurbishment with written approval.

Cost

No public:

- partner fee;
- depot licence fee;
- franchise fee.

A physical depot therefore cannot be costed exactly before Renew IT specifies requirements.

12. SHRED-X — likely corporate branch, not your franchise

Shred-X currently lists:

- 11 Australian locations;

- multiple NSW facilities;
- regional NSW service;
- secure e-waste/IT value recovery.

Sources:

<https://www.shred-x.com.au/contact/>

<https://www.shred-x.com.au/location/new-south-wales/>

<https://www.shred-x.com.au/e-waste/>

No public franchise program was found.

Process

Step 1

Contact NSW operations/business development.

Step 2

Pitch a Dubbo regional business case, not a franchise purchase.

Step 3

Include demand for more than ITAD:

- document destruction;
- secure media destruction;
- product destruction;
- e-waste;
- regional enterprise/government collection.

This matters because Shred-X branches support multiple service lines.

Step 4

Show route savings and customer density.

Step 5

Shred-X decides whether to:

- add Dubbo route capacity;
- hire a local driver/operator;
- establish depot;
- open corporate branch.

Cost to user

If Shred-X opens the branch itself:

- likely not your capital expense;
- your payoff would more likely be salary/commission/contracting.

If they required a contractor depot:

- terms are private.

Overall

Lowest fit for a self-owned Dubbo branch despite strong corporate branch capability.

13. What a sensible first-year plan looks like

Month 0 — spend almost nothing

Contact:

1. Greenbox
2. G1
3. Fliptech
4. WV
5. Iron Mountain
6. Renew IT
7. Shred-X

Do not lease anything.

Month 1 — choose one parent model

Obtain written answers on:

- commercial margin;
- ownership of assets;
- client ownership;
- resale value;
- collection geography;
- reporting;
- insurance;
- sanitisation;
- local storage;
- use of branding.

Months 1-3 — sell first

Target local organisations.

The objective is signed or real quoted work, not expressions of interest.

Track:

- assets per client;
- refresh cycle;
- pickup frequency;
- data-security needs;
- resale value;
- freight cost.

Months 3-6 — run jobs through parent company

Keep processing central.

Prove:

- demand;
- repeat business;
- actual margins;
- transport pain.

Gate before leasing

Only lease a Dubbo unit if all are true:

- recurring jobs;
- written parent support;
- written permitted local scope;
- annual volume forecast;
- local-site security requirements;
- insurance quote;
- legal/planning approval;
- financial model shows local site costs less than remote logistics or creates enough new revenue.

14. Revenue / payoff — what we can and cannot know

No shortlisted company publishes the local partner's:

- percentage commission;
- reseller discount;
- asset-recovery split;
- buyback spread;
- territory override;
- salary/commission;
- branch profit share.

Therefore there is no evidence-based exact dollar payoff yet.

The best public payoff signals are:

Greenbox

Explicitly says partner relationships can improve competitiveness through:
margins on asset recovery services.

G1

White-label services allow the local IT provider to own the client-facing service relationship.

Fliptech

Hardware buyback, paid/subsidised erasure and resale create multiple revenue pools, but a Dubbo split is not published.

WV

Commercial partners participate in operational delivery, but commercial terms are private.

Iron Mountain

Partner ecosystem is explicitly designed to create new revenue opportunities, but local ALM partner margin is private.

The highest-value next information is therefore:

the actual partner price book / margin sheet, not more public-web research.

15. Recommended order for the user

First: Greenbox

Reason:

- formal process;
- no published joining fee;
- direct partner pathway;
- white-label/co-branding;
- can directly service your customers;
- asset-recovery margin;
- 14-business-day stated approval target.

Ask for

Partner Programme pack + Dubbo/Central West regional discussion.

Second: G1

Ask for:

white-labelled Dubbo/Central West ITAD pricing for an IT service provider.

This could potentially launch without:

- lease;
- secure warehouse;
- Bianco;
- vehicle.

Third: Fliptech

Ask for:

3-6 cycle Western NSW pilot and potential authorised local operator model.

This has more upside but more uncertainty.

16. One number that should stop premature leasing

Using a current Dubbo industrial lease, low-end security benchmark, a small Blancco bundle, the possible second-hand dealer licence and a business-name fee:

\$27,261.30 first-year baseline before insurance, bond, outgoings, utilities, vehicle, tools, racking and labour.

With one full-time employee at only the national-minimum wage + super floor:

\$85,786.68 before those same additional unknown costs.

That is why the correct order is:

sell the service first, lease the branch second.

- Second-hand dealer fees: <https://www.nsw.gov.au/business-and-economy/running-a-business/industry-specific-business-requirements/pawnbrokers-and-second-hand-dealers/pawnbrokers-and-second-hand-dealers-fees>
- Minimum wage: <https://www.fairwork.gov.au/pay-and-wages/minimum-wages>
- Super guarantee: <https://www.ato.gov.au/tax-rates-and-codes/key-superannuation-rates-and-thresholds/super-guarantee>

18. Bottom line

The easiest and lowest-risk route is:

Greenbox partner or G1 white-label service first, with no Dubbo warehouse.

The best entrepreneurial bet is:

Fliptech regional pilot after you can show actual client demand.

A full Dubbo branch should be an outcome of proven contracts, not the starting point.

The very next commercial task is to obtain:

1. Greenbox's partner pack/pricing;
2. G1's white-label commercial pricing;
3. Fliptech's answer on an authorised regional pilot.

Those three documents will make the next cost model materially more exact than anything available publicly.

19. Separate ranking — most likely to open a physical Dubbo branch

This is a different question from "which is easiest/cheapest for the local operator to enter?"

Based on current public branch history, regional footprint and operating model:

Physical-branch likelihood rank | Company | Evidence-based reason
1 | Greenbox | Strongest documented branch/facility expansion history plus formal partner program,

white label/co-branding and regional computer roadshow precedent
 2 | G1 Asset Management | Same 11–50 LinkedIn band as Fliptech yet already runs multiple processing facilities and explicitly serves regional NSW
 3 | WV Technologies | Already operates six hubs across five states, making another regional node structurally consistent with its model
 4 | Fliptech | Best conceptual fit and historical national ambition, but no published second permanent branch or formal partner program
 5 | Shred-X | Strong corporate branch capability and regional NSW service, but may simply serve Dubbo from existing NSW sites rather than add another branch
 6 | Renew IT | Has scale and multiple depots but current pattern favours major-city processing facilities plus logistics/drop-off points
 7 | Iron Mountain / ACT | Huge capability, but a Dubbo processing branch would likely require major enterprise/government volume and corporate investment

This ranking is not a prediction or statement of any company's internal plans.

It is a public-evidence plausibility ranking.

20. Decision matrix — what to do with each one

Company | Ask for first | Do NOT ask for first | Spend before answer
 Greenbox | Partner Programme + Dubbo regional territory discussion | Full warehouse approval | \$0 company fee publicly identified
 G1 | White-labelled regional ITAD pricing | New processing facility | \$0 company fee publicly identified
 Fliptech | 3–6 cycle Central West pilot | Franchise | \$0 company fee publicly identified
 WV | Commercial logistics/ITAD partnership | Independent WV-branded branch | \$0 company fee publicly identified
 Iron Mountain | ALM Sell/Service partnership eligibility | Dubbo warehouse | \$0 partner fee publicly identified
 Renew IT | Dubbo drop-off / last-mile depot proposal | Franchise | \$0 franchise fee because none is published
 Shred-X | Corporate Dubbo business-case discussion | Buy a franchise | \$0 franchise fee because none is published

"\$0 publicly identified" means no entry fee was found in the public material. It does not mean onboarding is guaranteed to cost nothing.

21. Highest-return sequence before spending on premises

Step 1 — obtain three commercial documents

1. Greenbox Partner Programme pricing / rulebook
2. G1 white-label pricing / commercial terms
3. Fliptech written pilot / regional operator terms

These three documents answer most of the currently unknowable questions:

- margin;
- buyback split;
- client ownership;
- asset ownership;
- insurance;
- reporting;
- local custody;
- local sanitisation;
- use of brand;
- territory.

Step 2 — compare real dollars

Use the same sample job for all three:

100 business-class laptops, 3–5 years old, collected in Dubbo, serialised, sanitised, tested and routed to resale/reuse/recycling.

Ask each provider for:

- client charge;
- buyback/rebate;
- your margin;
- freight;
- erase cost;
- reporting cost;
- failed-device cost;
- who receives resale upside.

Step 3 — only then decide whether a local hub makes sense

If the parent will collect directly and still leave enough margin locally, a warehouse may never be necessary.

If the biggest cost is repeated Sydney/Canberra transport, a Dubbo secure hub becomes more valuable.

22. What "highest payoff" currently means

Because no provider publishes local partner margin, the actual dollar winner is unknown.

The current evidence supports:

Highest likely payoff per dollar invested

Greenbox Partner Program

because it combines:

- direct partner status;
- white label/co-branding;
- direct client servicing;
- preferred pricing;
- explicit asset-recovery margins;
- no public franchise fee;
- no warehouse requirement to start.

Lowest operational effort

G1 white-label

because G1 can perform:

- collection;
- data destruction;
- processing;
- reporting;

while the local IT provider owns the customer-facing service.

Highest speculative entrepreneurial upside

Fliptech

because a Dubbo model could potentially be negotiated as a new regional operating arrangement rather than joining a mature predefined channel.

Highest enterprise ceiling

Iron Mountain / WV / Greenbox

but these may give the local operator less ownership/autonomy.

23. Exact cost status table

Item	Exact/current published amount?	Amount / status
Greenbox joining fee	No published fee found	Unknown until partner pack
G1 white-label partner fee	No published fee found	Quote required
Fliptech partner/branch fee	No public program	Negotiated
WV commercial-partner fee	No published fee found	Negotiated
Iron Mountain partner fee	No published fee found	Partner terms required
Renew IT depot/franchise fee	No public program	Negotiated
Shred-X franchise fee	No public franchise program	Corporate decision
Business name	Yes	\$47/1yr or \$108/3yr
NSW second-hand dealer licence, if applicable	Yes	\$692/1yr
Current 190 m ² Dubbo industrial rent benchmark	Yes	\$395/week + GST + outgoings
Annual rent at that advertised rate	Calculated from published rent	\$20,540 + GST
Low-end small commercial security benchmark	Indicative, not quote	~\$5,000+
Blancco SMB Select 50 reseller benchmark	Current reseller price	\$982.30
National Minimum Wage	Yes	\$26.44/hr
Full-time national-minimum base	Calculated	\$52,254.80/year
12% super on that base	Calculated	\$6,270.58/year
Wage + super floor	Calculated	\$58,525.38/year
Modelled hub baseline before unknowns/labour	Calculated	\$27,261.30
Same model + one minimum-wage FTE	Calculated	\$85,786.68

The modelled totals are not quotes and deliberately exclude unknowns rather than hiding them inside a false "exact" estimate.
