

Dubbo eWaste NotebookLM Research Pack - Master Index

Generated: 6 October 2026

Repository source commit: c2103b6090c8

PDF count: 100

Internal repo documents: 74

External primary-source briefs: 25

Purpose

A curated, NotebookLM-ready research library for the Dubbo eWaste / AssetFlow project. It combines the project's strongest internal research with current primary-source briefs covering community repair, ITAD, e-waste, data sanitisation, policy, safety, schools, reuse, downstream recycling and digital inclusion.

Pack composition

Exactly 100 PDFs: 1 master index, 74 converted repository documents, and 25 original external-source briefs. The external briefs link to the source rather than reproducing full third-party publications.

Suggested NotebookLM use

Upload the 100 PDFs as one project. Start with this index and the executive synthesis, then ask NotebookLM to compare evidence across sources, identify conflicts, build operating procedures, draft partner questions, and separate verified facts from proposals or assumptions.

Contents

- 001 - Dubbo eWaste NotebookLM Research Pack - Master Index
Pack index | Curated from DubboEwaste repo + listed primary sources
