Pack generated: 6 October 2026

Major Australian e-waste, ITAD, reuse and device-redistribution players

Research date: 2 October 2026

Purpose: market map for DubboEwaste. This is a practical list of major national operators, important regional operators, stewardship schemes, reuse/social-enterprise organisations and collection channels relevant to e-waste, IT asset disposition (ITAD), refurbishment, data destruction, resale, donation and downstream recycling.

This is not a strict size ranking. Private operators do not publish directly comparable national volumes. "Major" here means nationally significant, government-recognised, large-scale, strategically relevant, or particularly useful as a benchmark/partner for DubboEwaste.

1. Core ITAD, reuse, refurbishment and e-waste operators

Organisation | Website | Why it matters

Sircel | <https://sircel.com/> | Large Australian end-to-end e-waste processor with ITAD, asset recovery, repurposing, data sanitisation, recycling and multiple Australian sites.

Greenbox | <https://www.greenbox.com.au/> | Major Australian IT asset lifecycle and ITAD operator covering collection, secure data sanitisation/destruction, asset recovery, remarketing and recycling.

Sims Lifecycle Services | <https://www.simslifecycle.com/> | Global ITAD/data-centre operator with Australian operations, including a dedicated Sydney/Villawood ITAD facility.

Iron Mountain Asset Lifecycle Management / ACT Group | <https://www.ironmountain.com/en-au/services/it-asset-lifecycle-management> | Major enterprise ITAD/lifecycle operator in Australia. Iron Mountain has acquired Australian ITAD group ACT Group, including ACT Logistics, ACT Networks and Australian Computer Traders.

Close the Loop | <https://closethe-loop.com.au/> | Large Australian circular-economy group now offering ITAD, secure asset recovery, refurbishment and e-waste processing as well as product-stewardship programs.

WorkVentures | <https://workventures.com.au/> | Major Australian IT social enterprise combining ITAD, refurbishment, secure data destruction, reuse, donation and digital inclusion.

Renew IT | <https://renew-it.com/> | Enterprise IT lifecycle / ITAD operator with buyback, secure data destruction, refurbishment, remarketing and recycling pathways.

PonyUp for Good | <https://www.ponyupforgood.com/> | Reuse-first corporate ITAD/social-impact model built around secure decommissioning, data erasure, remanufacture/remarketing and charitable impact.

FlipTech | <https://www.fliptech.com.au/home> | Australian e-waste collection and ITAD operator with bins, secure data handling, reuse/donation and recycling pathways.

SK tes | <https://www.sktes.com/> | Large global ITAD/e-waste and technology lifecycle operator with Australian operations; also connected historically/operationally to the SPS stewardship network.

Ecycle Solutions | <https://ecyclesolutions.net.au/> | National e-waste collection/recycling operator and one of the current approved NTCRS co-regulatory arrangements.

Ecoactiv | <https://ecoactiv.com.au/> | Consumer/business recycling platform and product-stewardship service operated by Activ Group Solutions; current NTCRS co-regulatory participant via Activ Group.

Ecocycle | <https://ecocycle.com.au/> | National specialist recycling group with e-waste capability and one of the current approved NTCRS co-regulatory arrangements.

Total Green Recycling | <https://www.totalgreenrecycling.com.au/> | Major WA e-waste recycler serving councils, businesses and individuals, including secure data destruction and IT recycling.

Shred-X | <https://www.shred-x.com.au/e-waste/> | National secure-destruction company with e-waste/IT asset lifecycle, data destruction, decommissioning, repurposing and recycling services in every state and territory.

Electronic Recycling Australia | <https://www.electronicrecyclingaustralia.com.au/> | South Australian social-enterprise e-waste recycler backed by Bedford, combining material recovery with employment

pathways for people with disability and other barriers.

CompNow | <https://www.compnow.com.au/> | Large Australian technology lifecycle/service provider with repair, refurbishment, secure data erasure, resale, donation and responsible recycling pathways.

Substation33 | <https://www.substation33.com.au/> | Queensland social enterprise that dismantles, repairs, reuses, repurposes and recycles e-waste while providing training and employment pathways.

2. National stewardship and scheme administrators

The Australian Government's current approved National Television and Computer Recycling Scheme (NTCRS) co-regulatory arrangements, as of 20 May 2026, are:

Organisation | Website | Notes

Activ Group Solutions / Ecoactiv | <https://activgroup.io/> and <https://ecoactiv.com.au/> | Government-listed current co-regulatory arrangement. Ecoactiv is part of Activ Group.

Australia and New Zealand Recycling Platform (ANZRP) / TechCollect | <https://www.anzrp.com.au/> and <https://techcollect.com.au/> | Government-listed current co-regulatory arrangement. TechCollect is ANZRP's national collection/recycling program.

Ecocycle | <https://ecocycle.com.au/> | Government-listed current co-regulatory arrangement.

Ecycle Solutions | <https://ecyclesolutions.net.au/> | Government-listed current co-regulatory arrangement.

Sustainable Product Stewards Australia (SPS) | <https://spsaust.com.au/> | Government-listed current co-regulatory arrangement; SPS describes itself as a joint venture involving TES and National E-Waste Alliance.

Other major national product-stewardship schemes

Organisation | Website | Scope

MobileMuster | <https://www.mobilemuster.com.au/> | Government-accredited, industry-funded national mobile-phone recycling program.

B-cycle | <https://bcycle.com.au/> | Australia's official battery stewardship/recycling scheme, run by the Battery Stewardship Council.

3. Device reuse, redistribution and digital inclusion

Organisation | Website | Why it matters

National Device Bank | <https://nationaldevicebank.org.au/> | National initiative combining device donation, professional refurbishment and redistribution to digitally excluded Australians.

Good360 Australia | <https://good360.org.au/> | National charity distribution network with a major digital-divide/device donation program and refurbishment partners.

Good Things Australia | <https://goodthingsaustralia.org/> | National digital-inclusion organisation and National Device Bank partner, focused on devices, connectivity and digital skills.

WorkVentures | <https://workventures.com.au/> | Also belongs here because it is a major refurbishment and device-redistribution partner for digital inclusion.

CompNow | <https://www.compnow.com.au/> | Relevant to corporate fleet recovery, refurbishment and donation pathways, including past Good360-linked device programs.

4. Important collection / retail channels

Organisation | Website | Why it matters

Officeworks – Bring it Back / Trade-In | <https://www.officeworks.com.au/information/about-us/recycling> | Major national retail collection and trade-in channel. Officeworks says it has collected more than 11,000 tonnes through Bring it Back and tech trade-in since 2015. It is a collection/reuse/recycling channel, not a specialist ITAD processor itself.

5. Battery processing relevant to e-waste operations

Organisation | Website | Why it matters

Envirostream Australia / Livium | <https://liviumcorp.com/battery-recycling/> | Australian onshore lithium and mixed-battery recycler; relevant to embedded-device batteries, damaged batteries and downstream battery pathways.

B-cycle | <https://bcycle.com.au/> | National battery stewardship and accredited collection/recycling network.

6. User's original list, verified/retained

These were already on the DubboEwaste shortlist and remain relevant:

- WorkVentures — <https://workventures.com.au/>
- Ecoactiv — <https://ecoactiv.com.au/>
- Ecycle Solutions — <https://ecyclesolutions.net.au/>
- TechCollect — <https://techcollect.com.au/>
- PonyUp for Good — <https://www.ponyupforgood.com/>
- Renew IT — <https://renew-it.com/>
- FlipTech — <https://www.fliptech.com.au/home>
- Good360 Australia — <https://good360.org.au/>
- Good Things Australia — <https://goodthingsaustralia.org/>
- National Device Bank — <https://nationaldevicebank.org.au/>
- MobileMuster — <https://www.mobilemuster.com.au/>
- SK tes — <https://www.sktes.com/>
- Sircel — <https://sircel.com/>

7. Biggest gaps in the original shortlist

The strongest omissions were:

1. Greenbox — one of the clearest Australian enterprise ITAD benchmarks.
2. Sims Lifecycle Services — major global ITAD/data-centre player with Australian processing capability.
3. Iron Mountain Asset Lifecycle Management / ACT Group — major enterprise ITAD player in Australia, strengthened by Iron Mountain's acquisition of ACT Group / Australian Computer Traders.
4. Close the Loop — large Australian circular-economy group with ITAD/refurb/e-waste capability.
5. Ecocycle — current NTCRS co-regulatory arrangement and national recycler.
6. Sustainable Product Stewards Australia (SPS) — current NTCRS co-regulatory arrangement.
7. ANZRP — the legal/operator entity behind TechCollect.
8. Activ Group Solutions — the legal/operator entity behind Ecoactiv and a current NTCRS co-regulatory arrangement.
9. Total Green Recycling — major WA e-waste processor.
10. Shred-X — national secure data-destruction and e-waste operator.
11. Electronic Recycling Australia — important social-enterprise recycler in South Australia.
12. CompNow — large corporate technology lifecycle/refurbishment operator.
13. Substation33 — significant social-enterprise repair/reuse/recycling operator in Queensland.
14. B-cycle — essential national battery-stewardship infrastructure.
15. Envirostream Australia — specialist Australian battery processor relevant to safe e-waste downstream handling.
16. Officeworks Bring it Back — major national front-door collection/trade-in channel.

8. What not to treat as equivalent competitors

These organisations occupy different parts of the chain:

- ITAD operators: secure enterprise collection, asset tracking, sanitisation, refurbishment, remarketing and recycling.
- Material recyclers: physical processing and commodity recovery.
- Co-regulatory arrangements: administer NTCRS obligations and contract collection/recycling services.
- Retail collection channels: collect devices and pass them into downstream networks.
- Digital-inclusion organisations: source, refurbish and redistribute usable devices to people who need them.
- Battery schemes/processors: handle a hazardous and increasingly important e-waste sub-stream.

DubboEwaste should therefore benchmark each organisation for the specific capability it represents instead of treating all of them as direct competitors.

9. Key public sources checked

- Australian Government / DCCEEW NTCRS co-regulatory arrangements: <https://www.dcceew.gov.au/environment/protection/waste/product-stewardship/products-schemes/television-computer-recycling-scheme/coreg-arrangements>
- Sircel services: <https://sircel.com/services/>
- Greenbox IT lifecycle / asset recovery: <https://www.greenbox.com.au/services/>
- Sims Lifecycle Services Australia: <https://www.simslifecycle.com/>
- Iron Mountain Asset Lifecycle Management Australia: <https://www.ironmountain.com/en-au/services/it-asset-lifecycle-management>
- Close the Loop: <https://closethe-loop.com.au/>
- Total Green Recycling: <https://www.totalgreenrecycling.com.au/>
- Shred-X e-waste: <https://www.shred-x.com.au/e-waste/>
- Electronic Recycling Australia: <https://www.electronicrecyclingaustralia.com.au/>
- CompNow sustainability: <https://www.compnow.com.au/sustainability-vision/>
- Substation33: <https://www.substation33.com.au/>
- MobileMuster: <https://www.mobilemuster.com.au/>
- B-cycle: <https://bcycle.com.au/>
- Good360 Digital Divide: <https://good360.org.au/digital-divide/>
- National Device Bank: <https://nationaldevicebank.org.au/>
- Envirostream/Livium: <https://liviumcorp.com/battery-recycling/>
- Officeworks Bring it Back: <https://www.officeworks.com.au/information/about-us/recycling>

10. Research cautions

- Do not infer actual processing volumes, profit, client lists, downstream routes or regional willingness from marketing claims alone.
- NTCRS co-regulatory status is a regulatory fact and should be checked against the current government list before relying on it.
- Several names overlap organisationally: TechCollect is operated by ANZRP, Ecoactiv is part of Activ Group, and SPS has links to TES. They should not be double-counted when estimating market concentration.
- A collection point or program is not necessarily the organisation physically processing the material.
