Source commit: c2103b6090c8

Pack generated: 6 October 2026

Category-Specific Intake Cards

Windows laptop / desktop

Accept preference: Windows 11-supported CPU/platform, TPM/Secure Boot-capable, 8 GB+ RAM as PROPOSED POLICY, SSD upgrade feasible, no unresolved Autopilot/BIOS/Absolute lock.

Check: model, CPU, RAM, SSD/HDD, charger, hinges/screen, battery, ports, BIOS password, Autopilot/OOBE, Windows activation.

Route older systems: Linux/special use only when demand is known; otherwise parts/scrap.

Mac

Check exact model/year, current macOS support, Activation Lock, Find My, ABM/MDM, battery/service status, keyboard/display, charger.

Reject resale: unresolved Activation Lock/MDM.

iPhone / iPad

Check IMEI/serial, Activation Lock/Find My, ABM/MDM, carrier/IMEI status, battery, Face/Touch ID, cameras, display, charge port, current iOS/iPadOS support.

Owner removes account/lock before transfer.

Android phone / tablet

Check IMEI, FRP/account protection, Knox Guard/enterprise enrolment where relevant, carrier block, current security-support horizon, battery, display, cameras, charge port, 000/network compatibility.

Avoid factory-resetting before legitimate account removal is confirmed.

Chromebook

Check exact model, Auto Update Expiration date, enterprise enrolment, battery, keyboard/trackpad, USB-C power, display.

Reject resale: unresolved enterprise enrolment.

Monitor

Check panel cracks/pressure spots/dead pixels/backlight, ports, stand/VESA, power supply, burn-in, resolution.

Avoid low-value bulky units without local sale or downstream route.

TV

Phase 0 preference: modern flat-screen/smart TV with known working status and local-sale/downstream route.

Check panel damage, backlight, HDMI, remote, stand, smart-platform support.

Do not accept CRTs until downstream acceptance is confirmed.

Networking gear

Check exact model, reset/admin ownership, firmware/support status, PSU, PoE, licensing/cloud lock.

Enterprise gear can be valuable but may be useless with subscription/account binding.

Printers

Generally low priority. Accept only with a known resale/donation route; toner/ink leakage and consumable cost can erase margin.
