

Open Repair Alliance - How to Record Repairs

Source type: External primary-source research brief

Category: Repair data / operations

Primary source: <https://openrepair.org/open-data/how-to-get-started/>

Source checked: 6 October 2026

Source summary

This guide reduces repair-event data collection to a practical minimum: session/group and event date; product type, brand and estimated age; and the problem, repair outcome and main repair barrier. It is a useful model for keeping volunteer data entry short while still producing meaningful evidence.

Why this matters for Dubbo eWaste

Ideal for designing a lightweight Repair Cafe intake form in AssetFlow without overloading volunteers.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
