

Productivity Commission - Right to Repair Inquiry Report

Source type: External primary-source research brief

Category: Repair policy

Primary source: <https://www.pc.gov.au/inquiries-and-research/repair/report/>

Source checked: 6 October 2026

Source summary

The Productivity Commission's 2021 Right to Repair inquiry found significant and unnecessary barriers to repair for some products and examined competition, access to repair information, embedded software, premature obsolescence and e-waste. Although not a current statute, the report remains a major Australian policy reference for understanding the economic and consumer-policy case for repair.

Why this matters for Dubbo eWaste

Provides Australian policy context for why regional repair/refurbishment capability matters and where barriers such as parts, software and information arise.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
