

NIST SP 800-88 Rev. 2 - Guidelines for Media Sanitization

Source type: External primary-source research brief

Category: Data sanitisation / ITAD

Primary source: <https://csrc.nist.gov/pubs/sp/800/88/r2/final>

Source checked: 6 October 2026

Source summary

NIST SP 800-88 Rev. 2, published in September 2025, reframes sanitisation around an organisation-wide media sanitisation program rather than a simple list of wipe recipes. It emphasises appropriate Clear, Purge or Destroy outcomes, validation, vendor trust, cryptographic erase and use of current standards such as IEEE 2883 or an organisation-approved procedure.

Why this matters for Dubbo eWaste

Core reference for Dubbo ITAD's media sanitisation policy, evidence requirements, release gates and client-facing assurance.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
