

ASD/ACSC - Guidelines for Media (September 2026)

Source type: External primary-source research brief

Category: Cyber security / media handling

Primary source: <https://www.cyber.gov.au/business-government/asds-cyber-security-frameworks/ism/cyber-security-guidelines/guidelines-for-media>

Source checked: 6 October 2026

Source summary

The Australian Signals Directorate's September 2026 media guidelines cover media management, secure handling, sanitisation before reuse or movement between security domains, and media-specific sanitisation considerations. The guidance is written for government and larger organisations but provides a current Australian security reference for handling data-bearing equipment.

Why this matters for Dubbo eWaste

Complements NIST with an Australian government security perspective and helps shape policies for business, school and government-sourced equipment.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
