

DCCEEW - E-Stewardship in Australia

Source type: External primary-source research brief

Category: Australian e-waste policy

Primary source: <https://www.dcceew.gov.au/environment/protection/waste/e-waste>

Source checked: 6 October 2026

Source summary

DCCEEW describes e-stewardship as shared lifecycle responsibility for electrical and electronic products and highlights the scale of Australia's e-waste challenge. The department reports 511,000 tonnes of Australian e-waste in 2019 and projects significant growth by 2030, while noting lost material value and hazardous constituents.

Why this matters for Dubbo eWaste

Provides federal context for positioning reuse and refurbishment as part of a broader stewardship and circular-economy problem.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
