

NSW EPA - Circular Economy and Local Government

Source type: External primary-source research brief

Category: Circular economy / local government

Primary source: <https://www.epa.nsw.gov.au/Working-together/For-local-government/Circular-economy>

Source checked: 6 October 2026

Source summary

NSW EPA places avoidance and reduction first in the waste hierarchy, followed by reuse, then recycling. It specifically identifies repair and reuse before disposal as circular-economy actions and notes local government's ability to influence markets, community behaviour, investment and jobs.

Why this matters for Dubbo eWaste

Useful policy basis for pitching a Dubbo reuse/repair pilot to council as local circular-economy infrastructure rather than merely a recycling service.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
