

SafeWork NSW - Lithium-ion Battery Workplace Safety

Source type: External primary-source research brief

Category: Battery / workshop safety

Primary source: <https://www.safework.nsw.gov.au/hazards-a-z/lithium-ion-batteries>

Source checked: 6 October 2026

Source summary

SafeWork NSW identifies fire, explosion, chemical exposure, electrical and storage risks from lithium-ion batteries and expects PCBU's to assess risks, establish safe systems of work, train workers, manage charging/storage and plan for emergencies. Damaged or swollen batteries require special caution and should not be used or charged.

Why this matters for Dubbo eWaste

Directly relevant to laptop and mobile intake, quarantine, charging, storage and emergency procedures in a home-shed or small workshop.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
