

Fire and Rescue NSW - Battery and Charging Safety

Source type: External primary-source research brief

Category: Battery / fire safety

Primary source: <https://www.fire.nsw.gov.au/fire-safety/home-fire-safety/battery-and-charging-safety>

Source checked: 6 October 2026

Source summary

Fire and Rescue NSW describes lithium-ion batteries as a rapidly growing fire risk and explains common failure causes including overcharging, overheating, physical damage, short circuits and manufacturing defects. The guidance emphasises safe charging, condition checks and appropriate recycling.

Why this matters for Dubbo eWaste

A practical fire-safety reference for designing battery inspection, charging and storage rules around refurbished laptops and mobile devices.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
