

Fire and Rescue NSW - Shop, Charge and Recycle Lithium-ion Batteries Safely

Source type: External primary-source research brief

Category: Battery / fire safety

Primary source: <https://www.fire.nsw.gov.au/fire-safety/home-fire-safety/topics/shop-charge-and-recycle-safely>

Source checked: 6 October 2026

Source summary

FRNSW provides lifecycle guidance for buying, charging, inspecting and recycling lithium-ion batteries. It warns against damaged, swollen, leaking, wet or overheated batteries, says batteries should never be placed in ordinary bins, and gives separation and disposal advice for damaged batteries.

Why this matters for Dubbo eWaste

Useful for a visible workshop SOP and intake rejection/quarantine rules, especially where damaged laptop batteries may arrive mixed with reusable equipment.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
