

TechCollect - Where E-waste Goes

Source type: External primary-source research brief

Category: Downstream recycling

Primary source: <https://techcollect.com.au/about-us/where-does-our-e-waste-go/>

Source checked: 6 October 2026

Source summary

TechCollect states that collected e-waste is sent to approved Australian recycling partners that operate under environmental and work-health-and-safety controls and relevant certification. It describes first-stage recycling as dismantling, shredding and sorting devices into material streams such as metals, plastics, glass, batteries and circuit boards.

Why this matters for Dubbo eWaste

Useful for understanding the downstream recycling alternative when Dubbo equipment is not suitable for reuse and for keeping recycling claims separate from refurbishment claims.

Source handling note

This PDF is an original research brief prepared for the NotebookLM pack. It summarises the linked source and does not reproduce the source publication in full. Re-check the linked primary source before relying on time-sensitive legal, regulatory, pricing or operational details.
